Subject: Update on Dimock Project

John and Richard,

Attached is the most recent Lab Status Summary. Sampling will begin again next week. So far only four homes are planned. There is another status meeting on Thursday and if any plans change we'll be sure to give you the update before Friday. If the schedule stays at this level I don't think we'll need any additional assistance for the organic and inorganic parameters for the R3 Lab.

Stevie Wilding is contacting David to see if R6 can provide support for the ethylene glycol. If not, these probably would be contracted out for March sampling.

Thank you again for all your help and for the quick TAT of the reports!!
Cindy
